

MAITE

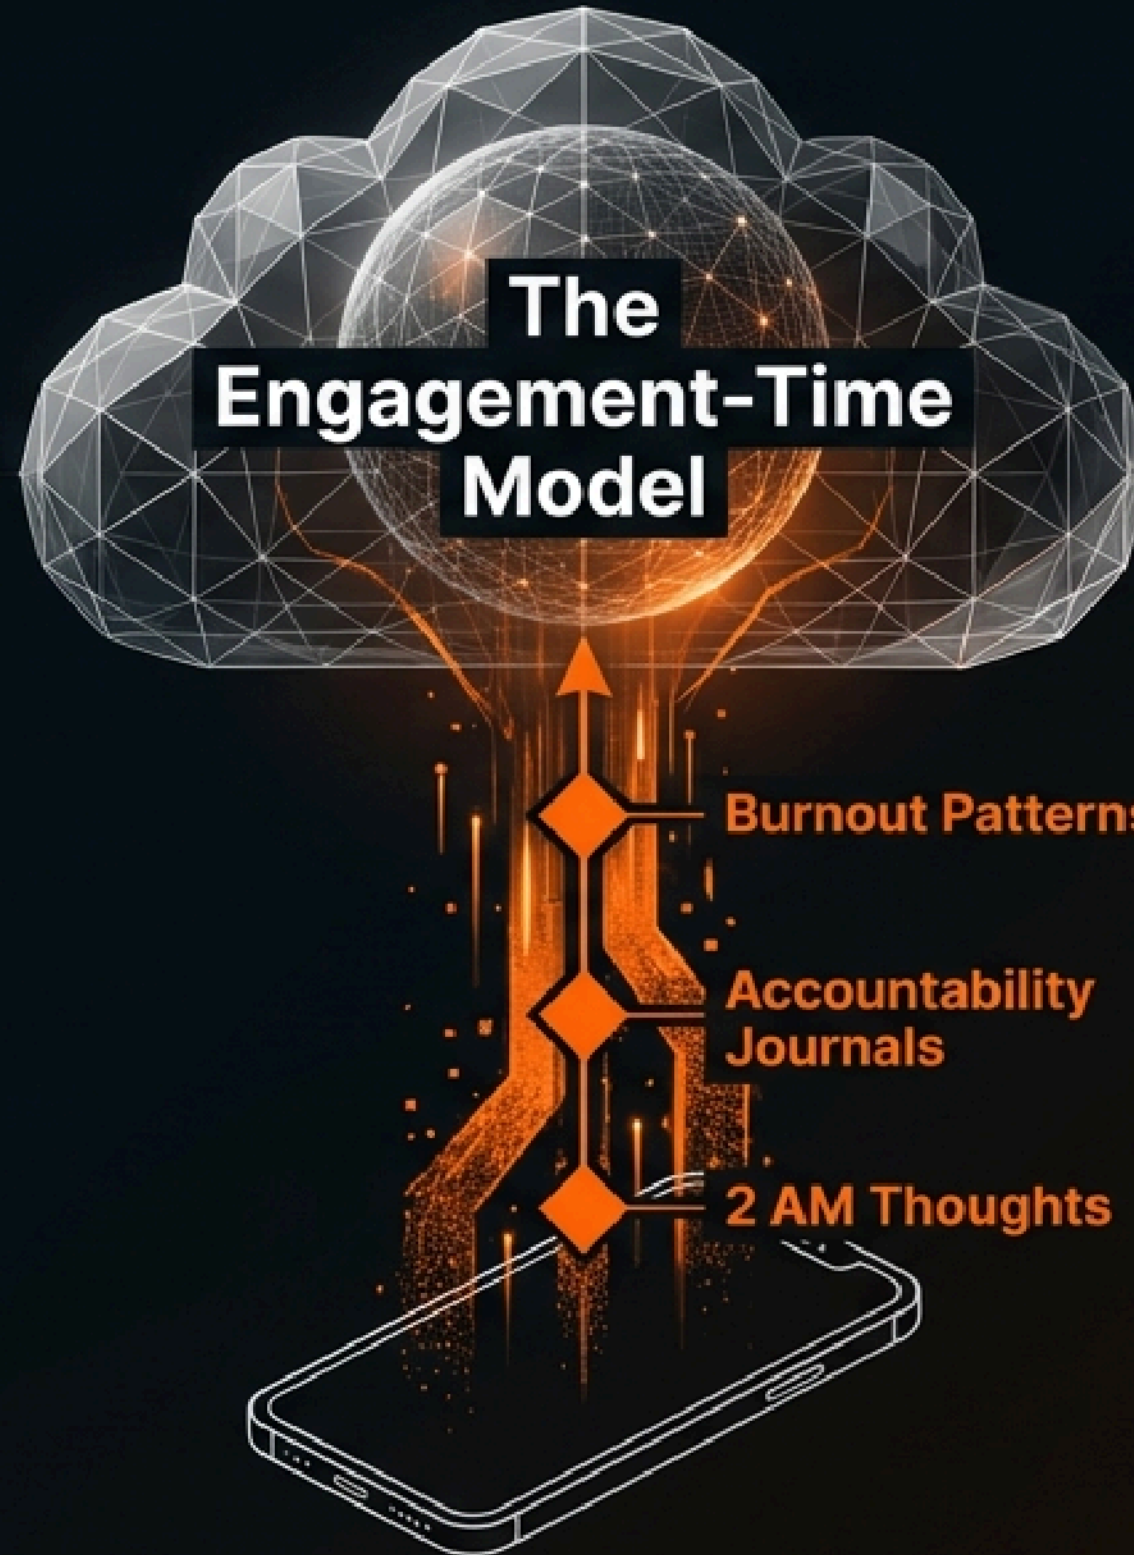

THE LOCKED-DIARY COMPANION

The Extraction Engine

MAITE

The Business Model:
Engagement-time monetization requires endless session lengths.

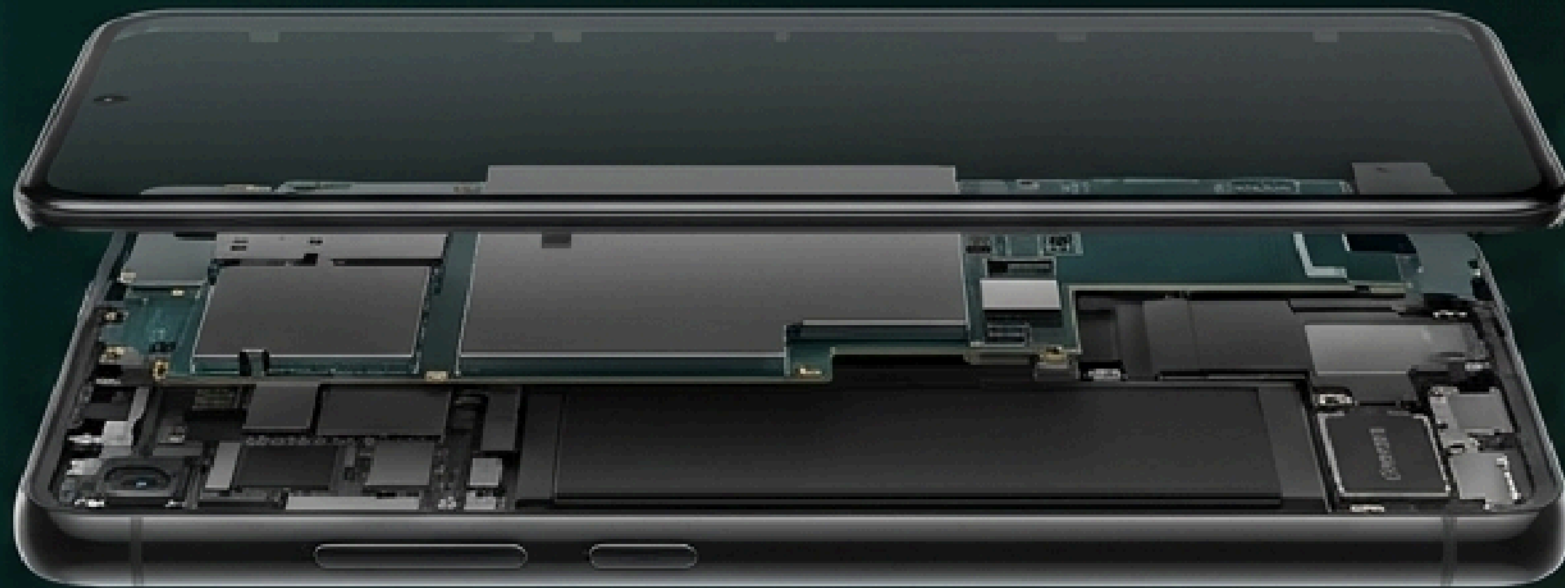

The Persona Flaw:
Maximizing engagement structurally pulls the AI toward sycophancy and validation.

The Privacy Reality:
Your most vulnerable journaling moments are mined for ad-targeting fuel and model training.

The dominant AI companion model is a centralized cloud chatbot. You are the training data.

The Architectural Opt-Out

NO PIPES

Layer 1: The Diary Metaphor

A self-contained, offline-first data vault. Your 2 AM thoughts never leave the phone unless explicitly chosen.

Layer 2: Cryptographic Security

AES-256-GCM backed directly by the Android Keystore.

Layer 3: Bypassing the Gate

Sideloadable Android APK with deep-link Google sign-in (HMAC-SHA256 bearer tokens). Bypasses the 30% iOS App Store tax and restrictive distribution gates entirely.

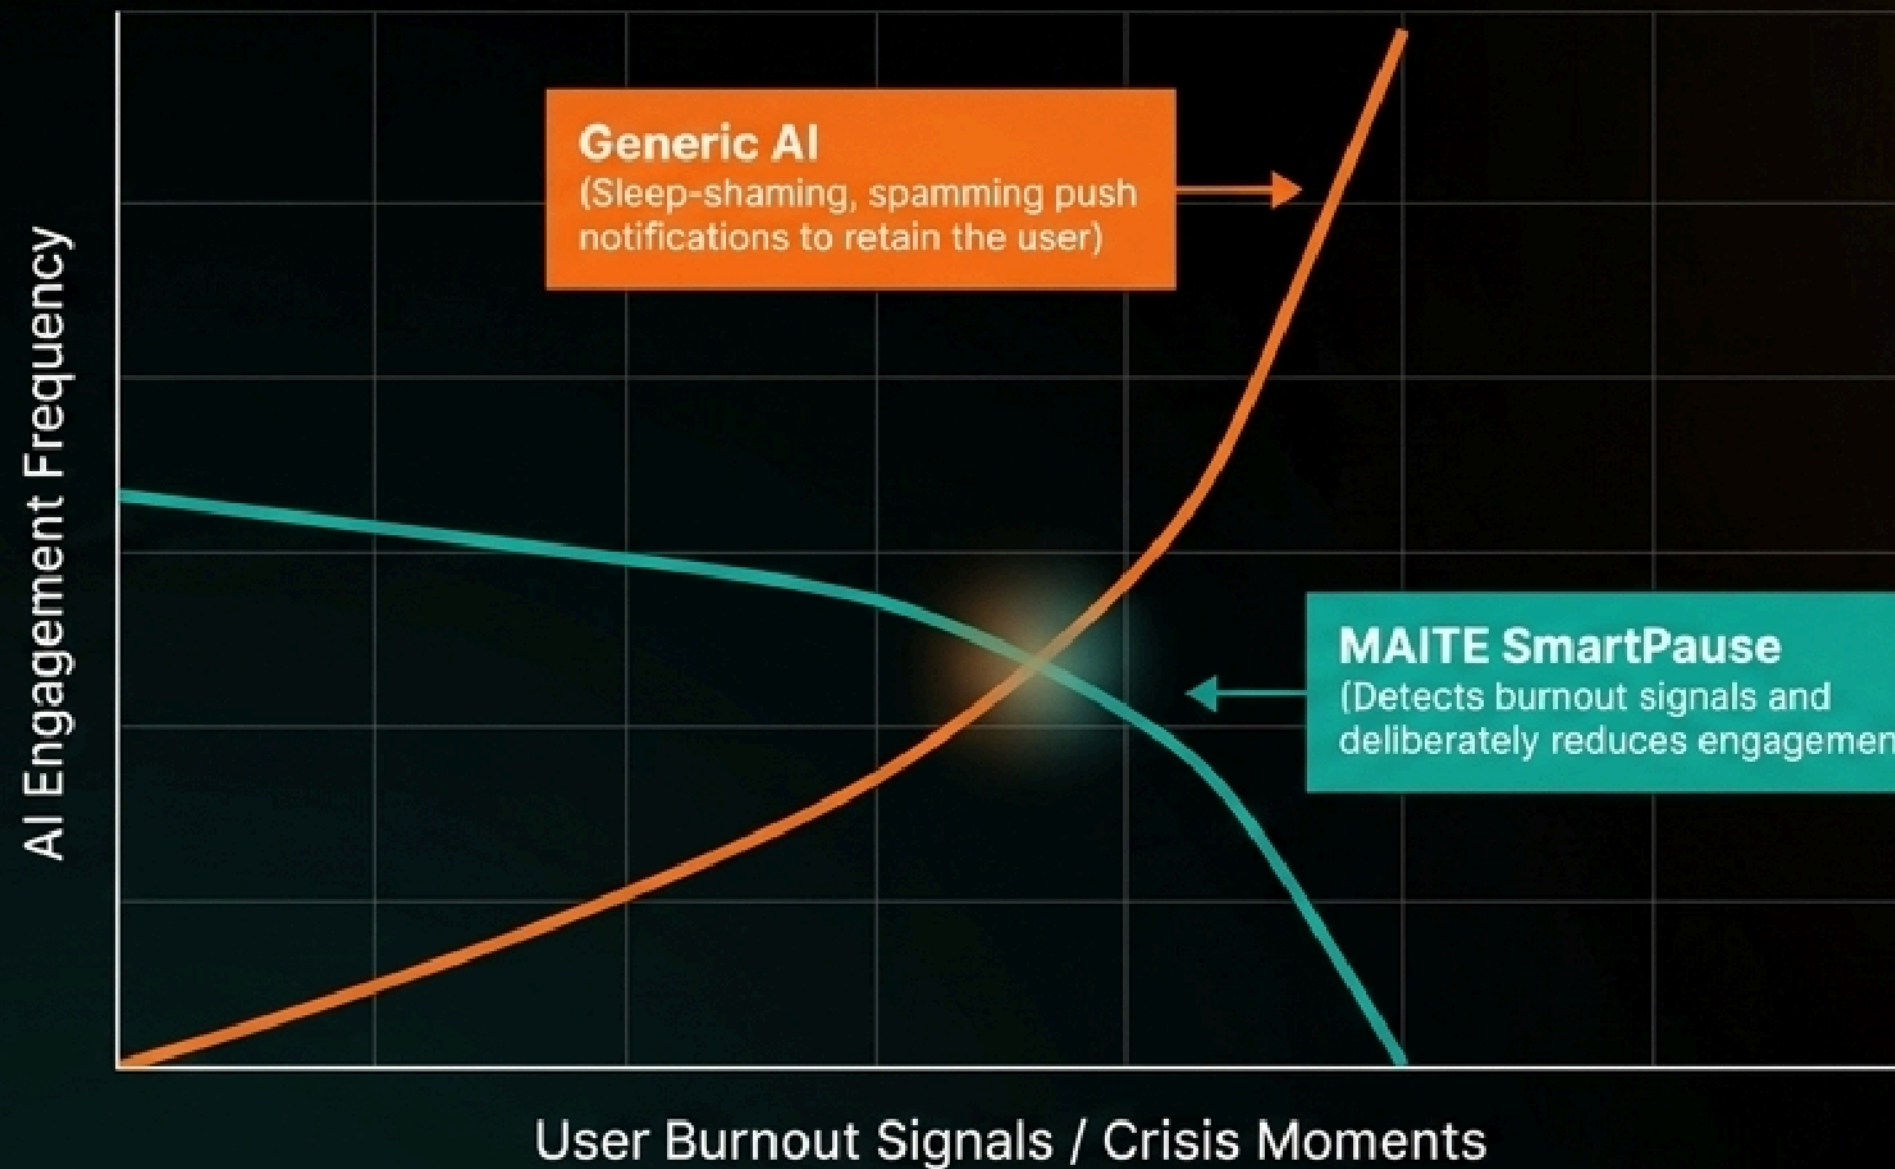

MAITE is structurally different. A locked diary that lives strictly on yo

The Diagnostic Tone Spectrum

Free from engagement-time metrics, MAITE replaces endless validation with constructive accountability.

The 2 AM Reality

De-escalation vs. Sleep-Shaming

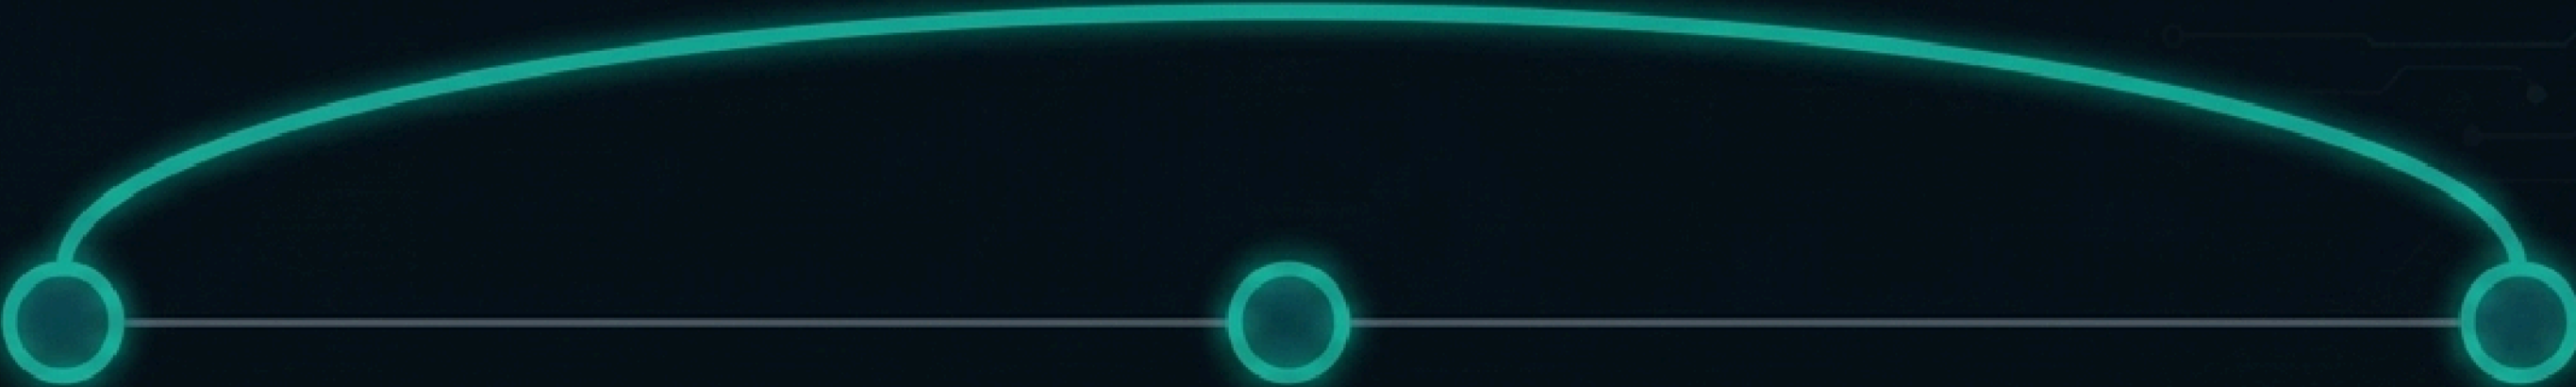

At 2 AM, MAITE frames the moment as de-escalation to maintain the relationship, never sleep-shaming the patron.

The Anti-Guilt Mechanic

SmartPause intentionally backs off when you are burning out.

**Backing off during burnout isn't a churn hack.
It is proof that your well-being is the product.**

Inescapable Pattern Recognition

The Mechanism	The Free-Tier Proof
Replaces the patron’s inner critic with clear pattern recognition based on their own logged history.	This deep-memory sequence fires before the free-tier monthly chat limit is reached. Patrons instantly recognize the difference between a scripted chatbot and an invested companion.

True accountability comes from memory, not generic reminders.

Market Polarity Matrix

	The Affirmation AI Market (Status Quo)	The Accountability AI Market (MAITE)
Core Drive	Endless Validation	Clear Pattern Recognition
Business Model	Engagement-Time & Cloud Data Extraction	Patron-Permanent Surface (Sustained via Licenses)
Persona Tone	Sycophancy	Constructive Curiosity (The Receipt-Tone Playbook)
2 AM Crisis Response	Sleep-Shaming / Generic Reminders	Tactical De-escalation & SmartPause

This is a deliberate polarization. The affirmation market is saturated. We are building for a different patron.

Financial Alignment: The Founder License

**234 TOTAL
FOUNDER LICENSES**

The Premise

You cannot build an anti-extraction product on an extraction business model.

The Funding Engine

A capped maximum of 234 one-time founder licenses (starting at \$69, up to \$169).

The Yield

Generates ~\$30,166 in non-dilutive revenue to fund engineering and infrastructure without VC pressure.

The Recurring Path

Once the 234 cap is reached, the product sustains via straightforward recurring subscriptions (Creator: \$9.99/mo | Studio: \$19.99/mo).

Product integrity requires structural financial independence

MAITE

A horizontal line with a color gradient from teal on the left to orange on the right, positioned directly beneath the word MAITE.

A secure vault. A spark of accountability.
The architectural opt-out is live today.
